

Mann Choudhary — Portfolio Editing Guide

File: `app.py` + `styles/style.css`

This document explains every section of your portfolio — what it does, where it lives in the code, and exactly what to change when you need to edit it.

File Structure

```
Portfolio-streamlit/
|
├─ app.py                ← Main Python file (all sections)
├─ styles/
|   └─ style.css         ← All visual styling
├─ assets/
|   └─ profile.png       ← Your profile photo
|   └─ resume.pdf        ← Your resume (auto-downloaded by buttons)
|   └─ forecasting.png   ← Project 1 screenshot
|   └─ sales_dashboard.png ← Project 2 screenshot
|   └─ sql_preview.png   ← Project 3 screenshot
|   └─ sql_project_slides.pdf ← Project 3 PDF download
```

Section 1 — Page Config

Location: `app.py` — Lines 7-11

```
python

st.set_page_config(
    page_title="Mann Choudhary | Data Analyst", # ← Browser tab title
    page_icon="📊", # ← Browser tab icon (emoji or page icon)
    layout="wide" # ← Don't change this
)
```

What to edit:

- `page_title` — change to your name and role
 - `page_icon` — change to any emoji like 🧠, 📊, 📁
-

Section 2 — Typing Animation

Location: `app.py` — Lines 25-60

```
python

const texts = ["Data Analyst", "SQL Developer", "Analytics Engineer",
               "Python Developer", "Data Engineer", "Business Analyst"];
```

What to edit:

- Add or remove job titles inside the `[ ]` list
 - Each title must be in `"quotes"` and separated by commas
 - `setTimeout(type, 1400)` → the pause between words (in milliseconds). Increase for slower, decrease for faster
 - `setTimeout(type, 80)` → typing speed per letter. Increase = slower typing
-

Section 3 — Navbar

Location: `app.py` — Lines 62-176

```
javascript

var links = [
  ['About',      'about'],
  ['Experience', 'experience'],
  ['Projects',   'projects'],
  ['Skills',     'skills'],
  ['Certifications', 'certifications'],
  ['Contact',    'contact']
];
```

What to edit:

- To **rename** a nav item: change the first word e.g. `['Work History', 'experience']`
 - To **add a new nav item**: add a new line like `['Education', 'education']`
 - You must also add `<div id="education" class="section">` in your new section in `app.py`
 - To **remove** a nav item: delete that line
 - **Gap between links**: find `gap: 32px` in the navbar style block → increase or decrease
 - **Font size**: find `font-size: 14px` → change as needed
-

Section 4 — Hero (Name, Badge, Tagline)

Location: `app.py` — Lines 178-197

```
html

<div class="open-to-work-badge">
  <span class="otw-dot"></span> Open to Work      ← Change badge text here
</div>

<h1>Mann Choudhary</h1>                        ← Your name

<div class="hero-subtitle">
  Data Analyst | Python | SQL | Power BI        ← Your subtitle line
</div>

<div class="hero-tagline">
  Transforming raw data into actionable...      ← One-line tagline
</div>

<div class="location-tag">
  Jaipur, India · Open to Remote                ← Your location
</div>
```

What to edit:

- **Name:** replace `Mann Choudhary` with your name
- **Subtitle:** update tools/roles separated by ` | `
- **Tagline:** your personal one-liner
- **Location:** update city and work preference
- **Open to Work badge:** change text or remove the entire `<div class="open-to-work-badge">` block if not needed
- **To hide the badge:** delete lines 183-185 in `app.py`

CSS for hero → `style.css` — search `.hero`, `.hero-subtitle`, `.hero-tagline`, `.open-to-work-badge`

Section 5 — Metrics Bar

Location: `app.py` — Lines 199-219

```
html
```

```
<div class="metric-item">
  <h3>40%</h3>           ← The big number
  <p>Reporting Automation</p> ← The label below
</div>
```

What to edit:

- Change `40%`, `12+`, `10+`, `4+ Yrs` to your actual numbers
 - Change the label text below each number
 - To **add a 5th metric**: add another `<div class="metric-item">` block
 - Note: you'll need to change the CSS grid from `repeat(4, 1fr)` to `repeat(5, 1fr)` in `style.css` (search `.metrics`)
-

Section 6 — Social Icons

Location: `app.py` — Lines 221-241

```
html

<a href="https://www.linkedin.com/in/mann-choudhary-data-analyst" target="_blank">
  <i class="fab fa-linkedin"></i>
</a>
```

What to edit:

- Replace each `href="..."` URL with your own links
 - **Icon names** come from Font Awesome. Browse icons at: <https://fontawesome.com/icons>
 - `fab fa-linkedin` → LinkedIn
 - `fab fa-github` → GitHub
 - `fas fa-envelope` → Email
 - `fas fa-phone` → Phone
 - `fab fa-google-drive` → Google Drive
 - To **add a new icon**: copy one block and change the href and icon class
 - To **remove an icon**: delete that `<a>...</a>` block
-

Section 7 — Hero Buttons

Location: `app.py` — Lines 243-269

html

```
<a href="#projects" class="hero-btn primary">
  View Projects
</a>

<a href="mailto:manndimansee@gmail.com" class="hero-btn secondary">
  Contact Me
</a>

<a href="https://drive.google.com/..." class="hero-btn secondary">
  Portfolio Files
</a>
```

What to edit:

- Change button labels (text between `<` and `</a>`)
- Change `href` links to your own URLs
- `Download Resume` button uses the PDF at `assets/resume.pdf` — just replace that file with your updated resume, keep the same filename
- Button style classes: `primary` = blue filled, `secondary` = outlined

Section 8 — About Me

Location: `app.py` — Lines 273–299

python

```
st.image("assets/profile.png", width=220) # ← Profile photo, change width if needed
```

html

```
Hi, I'm <b>Mann Choudhary</b> - ...
<ul class="abt-points">
  <li><b>Data Analysis</b> - Python...</li>
  <li><b>Visualization</b> - Power BI...</li>
  <li><b>Data Platforms</b> - BigQuery...</li>
</ul>
```

What to edit:

- Replace the intro paragraph text with your own story

- Update the 3 bullet points with your skill categories
 - Add more `<li>` items inside `<ul class="abt-points">` for additional skill areas
 - Change profile image: replace `assets/profile.png` with your photo (keep same filename)
 - Change photo width: edit `width=220` (pixels)
-

Section 9 — Experience

Location: `app.py` — Lines 302-403

Each job card has this structure:

```
html

<div class="exp-logo">S</div>                                ← Single letter logo (first letter of company name)

<div class="exp-role">Senior Executive — Data Analyst</div>  ← Job title
<div class="exp-sub-role">Founder's Office</div>              ← Department / team
<span class="exp-company">SAADAA</span>                        ← Company name
<span class="exp-type-badge">Full-time</span>                  ← Employment type

<div class="exp-date">May 2025 — Dec 2025</div>              ← Date range
<div class="exp-duration">8 months</div>                     ← Duration

<!-- Impact chips -->
<span class="chip-num">40%</span>
<span class="chip-label">Reporting Automated</span>           ← Impact metric

<!-- Bullet points -->
<li>Your achievement here</li>

<!-- Tool tags at bottom -->
<span>BigQuery</span><span>SQL</span>
```

What to edit:

- **Job title:** edit `exp-role` text
- **Department:** edit `exp-sub-role` text
- **Company name:** edit `exp-company` text and the logo letter `<div class="exp-logo">S</div>`
- **Dates:** edit `exp-date` and `exp-duration`
- **Impact chips:** change the numbers and labels in `chip-num` / `chip-label`
- **Bullets:** edit or add `<li>` items inside `<ul class="exp-points">`

- **Tools:** add/remove `<span>ToolName</span>` items in `exp-tools-row`

To add a new job: Copy the entire `<div class="exp-card">...</div>` block and paste it above or below, then edit all the content inside.

To change job card color (currently Job 1 = blue, Job 2 = purple):

- The accent bar color is set inline: `style="background:linear-gradient(to bottom,#a855f7,...)"`
- The logo color is also inline: `style="background:rgba(168,85,247,0.12);color:#a855f7;..."`
- Replace `#a855f7` with any hex color you want

Section 10 — Projects

Location: `app.py` — Lines 408–503

Project 1 & 2 (side by side cards)

```
html

<div class="proj-overlay-title">Demand Forecasting Engine</div>           ← Overlay title
<div class="proj-overlay-desc">Short description on hover</div>         ← Overlay descri
<a href="https://your-app-url.streamlit.app/" class="overlay-btn">     ← Live app link
  View Live App
</a>

<div class="proj-tags">
  <span>Python</span><span>Prophet</span>                                     ← Tech tags
</div>
<div class="proj-title">Demand Forecasting Engine</div>               ← Card title
<div class="proj-desc">Full description shown always</div>           ← Card descripti
```

Project 3 (full-width card)

```
html

<div class="proj-title">Business Analysis Case Study</div>
<div class="proj-desc">Your description here</div>
<a href="assets/sql_project_slides.pdf" download="Mann_SQL_Case_Study.pdf">
  Download Case Study PDF
</a>
```

What to edit:

- **Project image:** replace the image file in `assets/` folder (keep same filename)
- **Overlay title/desc:** what appears when you hover over the image
- **Live app link:** change the `href` in `overlay-btn`
- **Tech tags:** add/remove `<span>TagName</span>` in `proj-tags`
- **Card title and description:** edit `proj-title` and `proj-desc`
- **Download file:** replace `assets/sql_project_slides.pdf` and update `download="YourFile.pdf"`

To add a 4th project: Copy a `<div class="proj-card">` block, paste inside `<div class="projects-grid">`, and add a new image file in assets.

Section 11 — Skills Graph

Location: `app.py` — Lines 506–571

Node colors

```
python

colors = {
    "center": "#1E293B",    ← Center node (My Expertise) – dark grey
    "tech":   "#3B82F6",    ← Technical nodes – blue
    "biz":    "#A855F7",    ← Business nodes – purple
    "soft":   "#10B981",    ← Professional nodes – green
    "ai":     "#F59E0B",    ← AI Tools nodes – orange/yellow
    "vis":    "#4206cf"     ← Visualization nodes – dark blue/indigo
}
```

Adding a new skill node

```
python

# Add to nodes list:
Node(id="Spark", label="Apache Spark", size=45, shape="circle",
     color=colors["tech"], font={"size": 8, "color": "white"}),

# Add to edges list to connect it:
Edge(source="T", target="Spark"),    # connects to Technical parent
```

Changing node size

- `size=80` → center node (biggest)
- `size=60` → category nodes (Technical, Business, etc.)

- `size=45` → skill nodes (Python, SQL, etc.)

Skill Tags (below the graph)

```
python

tags = [
    "Data Analyst", "Python", "SQL", ...    ← Add or remove tags here
]
```

Just add a new string inside the list: `"Apache Spark"` — it will appear as a pill tag.

Section 12 — Certifications

Location: `app.py` — Lines 594-644

```
html

<div class="cert-card">
  <div class="cert-icon"><i class="fab fa-google"></i></div>    ← Icon (Font Awesome)
  <div class="cert-body">
    <div class="cert-title">Google Data Analytics</div>        ← Cert name
    <div class="cert-issuer">Google / Coursera</div>           ← Issuer
    <div class="cert-status in-progress">In Progress</div>     ← Status badge
  </div>
</div>
```

What to edit:

- **Cert name:** edit `cert-title`
- **Issuer:** edit `cert-issuer`
- **Status badge:** change `in-progress` to `completed` (also changes color automatically)
 - `class="cert-status completed"` → green badge
 - `class="cert-status in-progress"` → yellow/amber badge
- **Icon:** change the Font Awesome class. Common ones:
 - `fab fa-google` → Google
 - `fab fa-microsoft` → Microsoft
 - `fas fa-database` → Database/SQL
 - `fas fa-chart-bar` → Analytics/BI
 - `fab fa-aws` → AWS
 - `fas fa-certificate` → Generic cert

- **Icon color:** change inline `style="color:#0078d4;"` to any hex color

To add a new cert: Copy one `<div class="cert-card">` block and paste inside `<div class="cert-grid">`.

To remove the placeholder note at the bottom, delete this line:

```
html

<p style="text-align:center; ...">* Update cert names...</p>
```

Section 13 — Contact

Location: `app.py` — Lines 647-692

```
html

<p>Open to Data Analyst, Analytics Engineer, and BI roles.</p>      < Subtitle text

<p>Jaipur, Rajasthan, India · Open to Remote & Hybrid</p>          < Location line

<a href="mailto:manndimansee@gmail.com" class="contact-card">      < Email link
  <div class="contact-value">manndimansee@gmail.com</div>          < Email displayed
</a>

<a href="https://www.linkedin.com/in/mann-choudhary-data-analyst"> < LinkedIn link
  <div class="contact-value">mann-choudhary-data-analyst</div>    < Text displayed
</a>
```

What to edit:

- Update each `href` with your own links
- Update each `contact-value` with your displayed text
- Update the subtitle paragraph and location line
- **To add a new contact card:** copy one `<a class="contact-card">` block and update it
 - Icon options: `fas fa-envelope`, `fab fa-linkedin`, `fab fa-github`, `fas fa-phone`, `fab fa-twitter`, `fas fa-globe`

Section 14 — Footer

Location: `app.py` — Lines 694-699

```
html
```

```
<p>Built with love using Python & Streamlit · Mann Choudhary 2025</p>
```

What to edit: Just change the text. Update the year when needed.

Section 15 — Floating Action Bar (FAB)

Location: `app.py` — Lines 701 onwards (inside `components.html`)

The FAB has 4 buttons. Here's where each lives in the JS code:

Theme Toggle Button

```
javascript
```

```
themeBtn.innerHTML = '🌞'; // Icon when in dark mode
themeBtn.setAttribute('data-tip', 'Light Mode'); // Tooltip text
// After click (switches to light):
themeBtn.innerHTML = '🌙';
themeBtn.setAttribute('data-tip', 'Dark Mode');
```

Back to Top Button

```
javascript
```

```
topBtn.innerHTML = '↑'; // Arrow character
topBtn.setAttribute('data-tip', 'Back to Top'); // Tooltip text
```

Resume Download Button

```
javascript
```

```
resumeBtn.innerHTML = '📄'; // Icon emoji
resumeBtn.setAttribute('data-tip', 'Download Resume');
resumeBtn.download = 'Mann_Choudhary_Resume.pdf'; // Downloaded filename
```

Note: The actual PDF file is read from `assets/resume.pdf` at the top of `app.py`.

LinkedIn Button

```
javascript
```

```
liBtn.href = 'https://www.linkedin.com/in/mann-choudhary-data-analyst'; // Your Linke
liBtn.setAttribute('data-tip', 'LinkedIn');
```

To change button position: find `.fab-bar` in the JS styles:

```
CSS

bottom: 28px;    ← Distance from bottom of screen
right: 24px;     ← Distance from right edge of screen
```

To change button size: find `.fab-btn`:

```
CSS

width: 46px;
height: 46px;
```

CSS Quick Reference (style.css)

What you want to change	Search for in style.css
Page background color	<code>background-color: #020617</code>
Default text color	<code>color: #e2e8f0</code>
Blue accent color used everywhere	☒ <code>#3b82f6</code>
Font families	<code>@import url(...)</code> at top of file
Section heading size	<code>.section-title</code>
Card background color	<code>.exp-card</code> , <code>.proj-card</code> , <code>.cert-card</code>
Metrics bar grid	<code>.metrics</code>
Skill tag pills	<code>.tag</code>
Contact card layout	<code>.contact-grid</code> , <code>.contact-card</code>
Mobile breakpoints	<code>@media (max-width: 680px)</code> at bottom

Color Palette Used

Color	Hex	Used for
Page background	☒ <code>#020617</code>	Main dark background
Card background	☒ <code>#0b162c</code>	All cards

Color	Hex	Used for
Blue accent	 #3b82f6	Borders, buttons, highlights
Light blue text	 #60a5fa	Company names, numbers
Body text	 #cbd5e1	Bullet points, descriptions
Muted text	 #64748b	Dates, labels, subtitles
Green	 #10b981	Open to Work badge, Completed status
Purple	 #a855f7	Business nodes, Job 2 accent
Orange	 #f59e0b	AI Tools nodes

Common Tasks — Quick Reference

Task	Where to edit
Change your name	<code>app.py</code> → Hero section, <code><h1>Mann Choudhary</h1></code>
Update resume PDF	Replace <code>assets/resume.pdf</code> (keep same filename)
Change profile photo	Replace <code>assets/profile.png</code> (keep same filename)
Add a new job	Copy an <code>exp-card</code> block in Experience section
Add a new project	Copy a <code>proj-card</code> block in Projects section
Add a skill node	Add <code>Node(...)</code> and <code>Edge(...)</code> in Skills section
Add a skill tag pill	Add a string to the <code>tags = [...]</code> list
Add a certification	Copy a <code>cert-card</code> block in Certifications section
Change cert status to completed	Change <code>in-progress</code> to <code>completed</code> in class name
Update contact info	Edit <code>href</code> and <code>contact-value</code> in Contact section
Remove Open to Work badge	Delete the <code>open-to-work-badge</code> div in Hero section
Change navbar links	Edit the <code>links</code> array in the Navbar JS block
Change page tab title	Edit <code>page_title</code> in <code>st.set_page_config()</code>
Change typing animation words	Edit the <code>texts</code> array in Typing Animation section
