Summary

Data Analyst with 2+ years of hands-on experience in business analytics and 4+ years in data operations & MIS reporting. Experienced in dashboard development, API data validation, and stakeholder collaboration. Recently built and deployed a hybrid SKU-level demand forecasting engine using statistical, Prophet, XGBoost and other important models to support data-driven retail decision-making. Skilled in SQL, Python, BigQuery, and business-focused analytics solutions.

Education

Business Analyst Career Program

Skill Academy by Testbook

April 2024 – Mar 2025

Bachelor of Commerce

University of Rajasthan, Jaipur

2024

Class XII (RBSE) – Commerce

Jaipur Cambridge Academy, Jaipur

2021

Work Experience

Senior Executive Data Analyst – SAADAA / Founder's Office

May 2025 – Dec 2025

- Integrated multiple data sources into centralized analytics systems for business reporting.
- Validated and audited API data from frontend systems to ensure data accuracy and consistency.
- Designed and maintained **5+ interactive dashboards** in **Google Looker Studio**, tracking **12+ KPIs** across sales, returns, and marketing performance.
- Reduced manual reporting effort by **40%** by automating recurring reports and dashboard refreshes.
- Worked closely with founders and collaborated with **5+ cross-functional stakeholders** to gather requirements and prepare **BRDs**.
- Coordinated with 5+ cross-functional teams (marketing, supply chain, finance) to translate business requirements into analytics solutions.
- Performed analysis and documentation using **BigQuery, Excel, Google Sheets, and MS Word**.
- Supported weekly and monthly performance reviews for leadership using real-time dashboards.

Key Impact

- Improved reporting reliability through structured API validation processes.
- Enabled faster decision-making by simplifying dashboards for non-technical users.
- Standardized requirement documentation using BRDs.

Data Entry Operator - Dakshina Overseas

Jul 2022 – Dec 2024

- Maintained and processed large datasets (10K+ records) with high accuracy using Excel.
- Created MIS reports using Pivot Tables, VLOOKUP, and advanced Excel formulas.
- Built basic dashboards and summaries for operational tracking.
- Worked with Wolfe Pak Software to manage and update transactional data.

Technical Skills

Data Analysis & Visualization: Excel, Power BI, Tableau, Google Looker Studio, Streamlit

Databases & Querying: SQL, Google BigQuery, MySQL

Programming & Analytics: Python, Pandas, NumPy, Time Series Analysis

Forecasting & ML: SARIMA, Prophet, XGBoost, Model Evaluation (MAPE)

Business Skills: Requirement Gathering, BRD Creation, Stakeholder Coordination

Methodologies: Agile

Projects

Hybrid SKU-Level Demand Forecasting Engine

- Designed and deployed a hybrid forecasting system combining SARIMA, Prophet, and XGBoost to predict SKU-level retail demand.
- Implemented trend-residual modeling to prevent artificial growth after seasonal demand spikes.
- Engineered time-series features including lag variables, rolling averages, and seasonal indicators.
- Built an interactive Streamlit dashboard with model selection and MAPE-based accuracy tracking.
- Applied hybrid modeling logic to stabilize seasonal demand forecasting for retail use cases.

Tech: Python, Streamlit, Prophet, XGBoost, Pandas, AI Tools

Live Demo: <https://demand-forecasting-engine-o22shix3vgbi5jgrvi4abg.streamlit.app/>

Store Data Analysis | Excel

- Analyzed store sales data using Excel tables and Pivot Tables.
- Created charts and slicers for insights by month, age group, and platform.

Tech: Excel

Project Link: [Store Data Analysis](#)

IMDb Movie Database Analysis | SQL

- Analyzed IMDb movie datasets to identify trends in ratings and performance.
- Wrote complex SQL queries to rank actors, directors, and genres.

Tech: SQL

Project Link: [IMDB Movie Database](#)

E-Commerce Sales Data Analysis | Power BI

- Built an interactive dashboard to track sales performance.
- Cleaned and transformed data using Power Query and Excel.
- Analyzed yearly, country-wise, and region-wise sales trends.

Tech: Power BI, Excel
